Introducing MAXCapture Health Office Management Solution

Our popular MAXCapture Medicaid Claiming System has been expanded to assist health office professionals in schools manage, coordinate and document their daily services to ALL students.

MAXCapture's suite of features, including scheduling and tracking modules, have helped hundreds of school districts efficiently manage the delivery of Medicaid eligible health services to students and maximize reimbursements to schools. Our new Health Office Management Solution, developed with the experience and insights of school health professionals, combines these tools into a centralized web-based school health management solution for school nurses including customized health templates, care plans, screenings, immunizations, state reporting, and clinic services.

The newly enhanced MAXCapture system eliminates the need for multiple distinct applications and enables users to increase efficiency by eliminating redundant data entry and streamlining communications. Users can expedite workflow through shared data, cohesive documentation and billing while working in a secure and compliant solution environment!

Key Functionality Highlights

- Meets individual state health data reporting requirements
- District specific templates for common diseases and recommended treatments
- Automated Medicaid billing eliminates duplicate data entry
- Tracks care plans and health office visits for services and medications
- Offers complete workflow process from student check-in to the completion of visit
- Maintain screening information and immunization data
- Service and medication reminders based on student care plans
- Generate parent notification forms using district-specific letter templates
- Gain access to extensive reporting capabilities
